

Smart way to make stain-free world

Lint Free Wipes • Non-woven Wipes • Micro-fiber Wipes • Lint Free Mop Wipes • Tack-rags Wipes
Cotton Wipes • Cotton Duster Wipes • Paper Wipes • Tissue Wipes • Lint Free Hand Gloves

ABOUT US

Maxim Plus, based near Pune is a leading manufacturer of high quality wiping solutions that are used in almost all critical applications. Our products include wide range of efficient wiping solutions including high quality Lint Free Wipes which are used in Automobile, Pharmaceutical, Micro Electronics, Paint-shop and many other industries. Our in-house R&D department & team of experts strive to provide complete wiping solutions to meet the requirement of minimizing the risk of contamination. With an objective to provide the best wiping solution to our customers who need the cleanest work areas to manufacture high quality products, we are their one stop solution. Our products are satisfactorily accepted by our customers making a pleasant professional relationship. Maxim Plus has ventured into a wide range of Personal Protective Equipment and is continuously growing and innovating.

MISSION

To provide high quality wiping solutions in the field of Industrial Wipes and Personal Protective Equipment. We aim to meet the demands and requirements of our customers and dedicatedly manufacture and supply the best quality innovative solutions with cost-effective and optimum utilization of resources.

VISION

To be the most respected firm in the industry and flourish by providing the best suitable and effective solutions to our customers. We want our customers to be stress free with respect to wiping, helping them achieve high quality end product.

Lint Free Wipes

ML101

ML102

ML103

ML104

The fabric which do not have protruding fiber or sticking out fiber (lint) on cleaning surface or the fabric which does not leave any fiber on the surface after cleaning with this cloth is called Lint Free Wipes.

Lint Free Wipes is a 100% polyester knitted lint free cloth. It has a special lined pattern that absorbs liquids, chemical and solvents at a faster rate than normal fabric. Their absorption level is so high, that they can absorb more than 200% liquid of their own weight. Smooth surface of the cloth ensures that no wiping marks are left behind.

PRODUCT SPECIFICATION

• Material	Super fine fabric
• Type	Knitted
• Weight	(100 to 210)GSM available
• Color	White, Blue
• Absorption	Very good absorption
• Rate Of Absorbency	below 1 second
• Lint free	Lint Free
• Cutting	laser cut and Machine Cut(+/-5mm accuracy)
• Size	9"x 9", 12"x12"

APPLICATION

• Automobile Industries
• Paint Shops
• Aerospace
• Electronic Industries
• Pharmaceuticals Industries
• R & D Labs
• Optical and glass Industries

PRODUCT FEATURES

• Excellent absorbency	The wipes are hydrophilic in nature which makes it easy to pick up solvents, thus reducing your wiping time.
• Good liquid holding	It takes solvent once and uses it for multiple wipes, in turn reducing the volume of solvent usage.
• Lint free sealed edges	Thermally sealed laser cut edges ensures the edges are free from loose threads and lint.
• Packing	Wipes are packed in High Quality clean room standard covers.
• Smooth and lint free surface	It ensures zero wiping marks.
• Chemical Resistant	Suitable for use with most of the industrial chemicals and solvents.
• Good dirt holding	The dirt readily sticks to the cloth due to the inbuilt static property.
• Customizable size	We customize our product size according to your requirement.
• Safe material	These wipes do not contain silicones, binders and additives.
• Economical	It is washable and reusable.

Non Woven Wipes

The material of Non-Woven Wipes support a number of applications where a unique combination of characteristics is achieved by a combination of fiber and additives. The wipes are expected to have the properties like smooth and soft texture, good absorbency characteristics, and good moisture retention properties. It is fabricated from a hydroentanglement, Non-woven blend of 55% cellulose and 45% polyester. This fabric blend combines the highly absorbent properties of a natural fiber with the cleanliness and strength of a synthetic wiper.

PRODUCT SPECIFICATION

• Material	Super fine fibers a patented technology
• Type	Nov Woven
• GSM	70 GSM
• Absorption	More than 300% liquid of its own weight
• Rate Of Absorbency	less than 1 second
• Weight	Available in 2 GSMs (Grams per square meter).60 GSM and 100GSM
• Color	White /BLUE
• Lint free	Less than 40 counts of 25 micron above particles
• Cutting, Stitching	Machine Cut
• Size	9"x9", 12"x12"

APPLICATION

• Pharmaceuticals manufacturing areas and laboratories
• Automobile manufacturing
• Printing industry (This wipes is very much suitable for printers)
• General cleaning in manufacturing plants
• Food Industries
• R & D Labs

PRODUCT FEATURES

• Excellent absorbency	The super fine fibers helps to ensure easy pick up of solvents. Which helps to reduce wiping time.
• Good liquid holding	Ensures a clean water free surface. It takes solvent once and uses it for multiple wipes, in turn reducing the volume of solvent usage.
• Lint free sealed edges	The wipes are machine cut. Hence, the edges are free from loose threads and lint.
• Smooth and lint free surface	Ensures zero wiping marks.
• Chemical resistant	Suitable for use with most of the industrial chemicals and solvents.
• Customizable size	We customize our product size according to your requirement.
• Safe material	These wipes do not contain binders and additives.

Micro Fiber Wipes

Micro fiber is a synthetic fiber that consists of polyester and polyamide. The polyester provides the structure of a towel, while the polyamide adds density and absorption. Micro fiber is a material that is durable, soft, and absorbent, making it perfect for a variety of uses.

PRODUCT SPECIFICATION

• Material	Combinations of polyester, polyamide, and polypropylene. .
• Type	Knitted
• Weight	(220-450)GSM (Calculated with the help of GSM cutting and measuringscale)
• Color	Blue, Orange
• Absorption	High
• Rate Of Absorbency	Below 1 Second
• Lint	Lint free Nature
• Resists Shrinking and Stretching	

APPLICATION

• Automobile industries
• Paint shops
• Optics & Glass Industries
• Electronics industries
• Aerospace

PRODUCT FEATURES

• Highly Absorbent
• Attracts Dirt
• Penetrates Small Spaces
• Lint Free
• Strong and Durable
• Cost Efficient
• Light Weight
• Resists Shrinking and Streching
• Wrinkle Free

Tack-rags Wipes

Tack cloth is a specialized type of wiping cloth that is treated with a tacky material. It is designed to remove loose particles of dust, dirt and lint that would contaminate a surface that is to be painted, coated, laminated, photo-etched, or otherwise finished.

The Reason for pre wiping surface is to remove any dust or loose dirt that may have settled on the surface to be painted. This is especially important in the last moments before spraying. If the practice is omitted there is a significant risk that the subsequently applied coating will suffer from elements of dust visible in final coat. Lint free cloths are imperative to maintain the clean standards of the paint shops.

It can be used to wipe the surface before painting, the maxing drum before every colour change, paint guns sanding areas, before and after snickering etc.

MOP's Wipes

PRODUCT SPECIFICATION

• Material	100% Polyester
• Stuff Inside the mop	Sponge/Cora Cloth (based on customer's requirement).
• Absorption	More than 400% liquid of its own weight.
• Rate Of Absorbency	less than 1 second.
• Color	White and Blue
• Lint free	Less than 30 count of 25 micron above particles.
• Cutting,Stitching	Cloth is laser cut with sealed edges and stitched in machine with lint free thread. Hence the mop does not leave lint or loose threads.
• Size	12x12 and 9x9 available

Lint free Mop's are suitable for wiping in high spillage area. Lint free Mop's are manufactured by stitching lint free cloth on both sides and attaching sponge / core cloth in between the mop which lifts water easily.

APPLICATION

• Surface preparation
• Collects and holds airborne dust particle
• Peel able coat to collect over spray paint particles
• Removing particles before painting
• Wiping down after polishing
• Removing stubborn dirt instead of claying

• Attempting to remove wax or other protective products
• Removing contaminants from a surface before proceeding to the next step
• Cleaning tools and/or equipment
• Some use tack cloths to use their dirty hands
• To remove stubborn paint deposition from metal component

Cotton Wipes

MC601

MC602

MC603

MC604

There is a wide range of cotton wipes because cotton wipes are regularly used in automobile, pharmaceutical and chemical industries. Cotton Wipes are found in variety like Cotton Towel, Cotton Duster, Cotton Yellow Duster, Cotton T-shirt, Hosiery Cotton, Sweet shirt Cotton and Fresh Baniyan.

PRODUCT SPECIFICATION

• Material	Cotton
• Absorption	Good absorption
• Rate Of Absorbency	Good
• Color	Multi-Color
• Cutting, Stitching	Machine Cut

APPLICATION

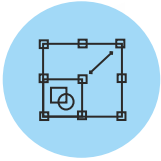

• Cleaning Oil and Chemical
• Automobile garage
• Fabrication
• Paint shop
• Hotels
• Floor cleaning

Paint Filter Cloth

Nylon filter cloth features the greatest abrasion resistance among the other three frequently used filter fabrics including polypropylene, polyester and cotton. It is often found in filtration applications of abrasive dusts and wet abrasive solids where abrasion resistance plays an important factor.

Nylon Filter Cloth is a mesh fabric that finds extensive applications in screen printing, paint shops and for dust collection bags. Typically made of Nylon fibres, the bolting cloth is extensively used across industries. As a premier provider of Nylon Mesh fabrics, these fabrics are available in various range of mesh/micron sizes.

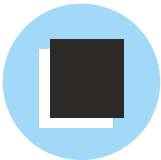

Customised Size

Every customer is Special.
We customise the size for you

Smooth Surface

Ensures No Marks
after your wiping job

Sealed edges

Laser cut technology
ensure lint free edges

Binder Free

No Additives and
silicones

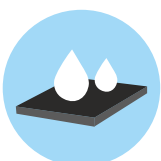

Good water holding

The Unique knitting pattern not only
absorbs at a faster rate, but also retains
2 times its weight of liquid.

Lint Free Surface

Polyester Continuous monofilament
fibre yarn doesn't let out fibre lints
from the surface

Hydrophilic Nature

A special treatment to pick up
water faster than usual.
